EPDM Rubber Roofing Information

EPDM is an extremely durable synthetic rubber roofing membrane (ethylene propylene diene terpolymer) widely used in low-slope buildings in the UK and worldwide. Its two primary ingredients, ethylene and propylene are derived from oil and natural gas.

Our EPDM rubber roofing is black, comes as standard on our Dalbury and Huntington garden rooms and is available as an upgrade on the pent style sheds and summerhouses.

EPDM is leagues ahead of some older traditional flat roof materials, it is suitable for extreme conditions, giving one of the most durable and reliable roof coverings available with a life expectancy of up to 50 years.

Not only is EPDM a great roofing option but it also has the following eco-friendly benefits:

- **Greenpeace approved**
- **Non-polluting rainwater**
- **Low smog impact**
- **Bitumen free**
- **Low global warning potential (GWP)**
- **Durability**
- **100% recyclable**
- **20-year guarantee**
