Restricted Access Information

Access can often pose a problem when looking to purchase a new garden shed or summerhouse, especially when you do not have direct access to your garden.

Shed City offer a split section service where we can manufacture your building in smaller sections for ease of access.

When enquiring about our split section service we will ask you for maximum and minimum heights, photographs, and a video walk-through showing the access from where our vehicle will park to where you require the building.

Often there are obstacles that are overlooked when considering the access required. Tight turns, stairways, pergolas, decorative archways, power cables and alike can prevent access. A video walkthrough will highlight these to us and enable us to advise on the best possible solution.

We will always endeavour to deliver and install buildings without the need for the split section service where possible.

If you have any queries regarding access to your desired location, please contact us by sending an email to hi@shedcity.co.uk

Please note there may be occasions when we will not be able to reduce the size of sections without compromising the integrity of the building. In such cases, we will do our best to suggest an alternative product or solution.
